IBM Certified System Administrator - MQ V8.0

```
Course#:E-410
Duration:30 Days
Price:835.56
```

Course Description

p style=font-size:14pxIBM Certified System Administrator - MQ V8.0 provide technical professionals with the skills needed to administer IBM MQ queue managers on distributed platforms such as Windows 2008 Server and Linux.In this course, you learn about IBM MQ V8 basic components, and learn the trajectory that messages follow when they are exchanged between two servers. You learn how IBM MQ V8 administrative responsibilities can manage the various servers.

Certification Number:

Test C9530-410 - IBM MQ V8.0, System Administration

Objectives

After this course you will be able to:

 Plan the implementation of IBM MQ

 Install IBM MQ

 Perform basic customization and administration tasks

 Enable a queue manager to exchange messages with another queue manager

 Use a trigger message and a trigger monitor to start an application to process messages

 Implement basic queue manager restart and recovery procedures

 Identify the cause of a problem

 Plan for and implement basic IBM MQ security features

 Use accounting and statistics messages to monitor the activities in an IBM MQ system

 Use IBM MQ sample programs to test queue manager, queue, channel, and client configuration

Audience

No Audience

Prerequisites

Working knowledge of IBM MQ

Working knowledge of supported operating systems (e.g., AIX, HP-UX, Solaris, Linux, Windows)

Good understanding of messaging concepts

Basic knowledge of operating MQ Explorer

Basic knowledge of networking concepts

Basic understanding of security concepts and protocols

Content

The following topics will be included in this course:

Planning, Installation, and Migration

Configuration

Administration

Security

IBM MQ clients

Monitoring and Configuration IBM MQ Performance

Monitoring and Configuration IBM MQ Performance

Problem Determination
