Course Description

The CompTIA A+ certification is the starting point for those who want to make IT their career. Globally recognised as the industry validation for entry-level computer technicians, this certification lays the foundation for mastery in computer and mobile hardware installation, troubleshooting, repairs and maintenance.

Our interactive comprehensive training will help you prepare for the two exams that you need to pass in order to become CompTIA A+ certified -- the CompTIA A+ Exam 220-801(A+ Essentials) and CompTIA A+ Exam 220-802(Practical Application). The CompTIA A+ Essentials examination measures fundamental competencies for IT professionals, while the CompTIA A+ Practical Application examination evaluates skills in practical use of current software and Operating System interface and features.

Certified candidates would have demonstrated competency and knowledge in the basics of computer technology, networking, and security, and will be able to work with hardware, peripherals, networking, and security components. With this internationally recognized credential under your belt, your employers can be assured that you have the prowess required of an entry-level IT professional.
