

## **TOGAF<sup>®</sup> PREP COURSE (Level 1 & 2 Combined) Version: v9.2**

**Course#: ITSM-01**

**Duration: 1 Day**

**Price: 0.00**

### **Course Description**

TOGAF is a global de facto standard for enterprise application that provides a unified approach to drive high-level business strategy and growth in an organization. Its worldwide acceptance has greatly increased the demand for TOGAF certified professionals, who can implement this approach to fit within the agile culture.

KnowledgeHuts intensive workshop will familiarize you with the principles and concepts of this framework while simultaneously exposing you to its practical implementation through hands-on exercises. Enroll now and become part of the elite global team of Enterprise Architects.

This program is based on TOGAF Standard, Version 9.2.

### **Objectives**

The course is filled with practical nuggets from the real world, and candidates will learn:

- How to align the business and IT aspects of your organization together
- How to respond to RFPs from the customer effectively
- The basics of TOGAF 9 and how it can be tailored for an organization
- How to go from strategy to execution when posed with having to find a solution to a customer problem
- Basic principles of Architecture Frameworks ( Zachman / TOGAF ) and how to apply them
- How to dive deep from Enterprise Architecture to Solution Architecture
- Basics of Architecture and Design, and practical application scenarios
- Basics of Solution Architecture and how to tailor solutions based on customer needs
- Requirements Prioritization for an Architect
- How an Architect views Agility: How much architecture is just needed for the hour and how much later

Project Management essentials for an Architect  
Best practices and nuances of IT transformations

## **Audience**

## **Prerequisites**

There are no prerequisites for the TOGAF9 Combined Foundation and Certified Certification Exam. Any and all candidates are eligible to attend this training, and take this examination. TOGAF9 Foundation must be completed in order to appear for TOGAF9 Certified exam.

Certification:

There are two parts to the Combined TOGAF9 certification. Candidates will have to clear both parts to be TOGAF9 certified.
