

## Project Management Techniques Training

**Course#: PM-06**

**Duration: 1 Day**

**Price: 127.00**

### Course Description

KnowledgeHut brings you Project Management Techniques, a comprehensive and interactive workshop that is an introduction to Modern Project Management and ideal for anyone who is new to the profession or needs a refresher in best practices.

Project Management is all about being efficient and effective and in this workshop you will learn the concepts, techniques and processes that will help you lead projects successfully and motivate your team. In the course we find how project management enables organisational outcomes in terms of project selection, initiation, planning, execution, monitoring and controlling.

The key constraints of Scope, Time, and Cost are integrated with Earned Value Management (EVM), to monitor and accurately estimate project outcomes.

This course is for project managers, associate project managers and project team members to build knowledge and skills, tools and techniques for successful project outcomes.

### Objectives

On successful completion of the course, you will receive a Course Completion Certificate from KnowledgeHut with Credits (1 credit per hour of training).

What you will learn:

- Determine goals, objectives, and requirements of a project
- Understand planning: what it does and does not do
- Create a precedence network diagram to determine early and late schedules
- Analyse the critical path and explore duration compression options
- How to use Gantt and Milestone charts

Implement and maintain performance measurement baselines

Establish guidelines for successful closeout

Apply general management skills to projects

You will also get:

Course completion certificate

Downloadable courseware

1 KnowledgeHut credit per hour of learning
