

Maximo Application Suite - Manage: Inventory Management

Course#:MAX4329G

Duration:8 Hours

Price:1000.00

Course Description

This 1-day instructor led course provides an understanding of the basic Inventory Applications that enable you to create items that will be ordered through various vendors. You also learn how to setup units of measure that determine quantities that are ordered and issued. Through a combination of procedural information, demonstrations, and exercises, you learn about topics such as what rotating and non-rotating items are and their differences and setting up condition enabled items.

Objectives

After completing this course, you should be able to:

Set up and manage items and assets

Use the Inventory application and related applications in the Maximo Application Suite

Use many available options for inventory usage
