IBM Maximo Asset Management 7.6 Implementation Bootcamp

`Course#:MAX7600G`
`Duration:72 Hours`
`Price:8000.00`

Course Description

This 9-day hands-on technical boot camp provides students with the ability to make informed decisions for the design, planning, and execution of a Maximo Implementation.

This in-depth workshop covers Supply Chain, Maximo features and functions, and materials management and implementation best practice. It also includes business process configurations, customizations, systems integrations, and post-Implementation considerations and activities.

Objectives

After you complete this course, you can perform the following tasks:

 Explain the value proposition for Maximo 7.6 and the Enterprise Asset Management portfolio including TRIRIGA and APM
 Perform a Demonstration of Maximo 7.6
 Have a clear understanding of the high-level capabilities and functionality of the core Maximo 7.6 product and key industry solutions and add-ons including Scheduler, Scheduler Plus and MAHI
 Employ and describe the different Maximo applications and functions as they relate to business processes
 Navigate, query, and retrieve data from the Maximo application
 Demonstrate the use of the Work Centre User interfaces
 Describe the asset management life cycle

Enter core data elements and data structures in Maximo

Modify screen designs and extend the Maximo data-model

Implement business process configurations (Workflow)

Customize Maximo using automation scripting

Follow a structured methodology for troubleshooting Maximo

Audience

This course is intended for Maximo 7.6 Implementation Consultants, Maximo Support consultants, Maximo Administrators, Technical Sales, Solution Architects and Project Managers

Prerequisites

None

Content

Module 1 Course Introduction

Module 2 Connected Operations Portfolio

Module 3 Basic Navigation

Module 4 Data Setup

Module 5 Conditional Security

Module 6 Items and Assets

Module 7 Purchasing

Module 8 Work Management

Module 9 Maximo Scheduler

Module 10 Preventive Maintenance

Module 11 Work Centers

Module 12 Asset Health

Module 13 Troubleshooting

Module 14 Integration Framework

Module 15 Workflow

Module 16 Automation Scripting

Module 17 Migration Manager

Module 18 UI Customization

Module 19 Inspections for Receiving

Module 20 REST API
