

Managing IBM Sterling File Gateway

Course#:ODC6100G
Duration:16 Hours
Price:1900.00

Course Description

This 2-day course introduces the student to the Sterling File Gateway functionality and provides the specific technical skills needed to deploy and support it. The course provides an overview of the features and provides hands-on exercises for creating routing templates, transforming file names, searching for files within a route, and reporting on file transfers.

Objectives

After completing this course, students should be able to:

- Install and configure Sterling File Gateway.
- Describe community, groups and users.
- Build static and dynamic routing channel templates.
- Describe the different personas and their responsibilities.
- Configure routing channels.
- Transfer file from a producer to a consumer.
- Broadcast messages.
- Explain the enhanced visibility to track a route.
- Explain container and non-container layers.
- Generate reports.
- Discuss the procedure for Sterling File Gateway extensibility.

Audience

This course is designed for administrative users who administer the Sterling File Gateway

application.

Prerequisites

Before taking this course, students should have a working knowledge of IBM Sterling B2B Integrator

Content

UNIT 1. OVERVIEW OF STERLING FILE GATEWAY

Lesson 1. Introduction

Lesson 2. Users and Trading Partners

Lesson 3. Route Channel Templates (RCT)

Lesson 4. Mailbox Management

Lesson 5. Static Route

UNIT 2. IMPLEMENTATION

Lesson 1. Dynamic Route

Lesson 2. File Layers

Lesson 3. Reports

Lesson 4. Extensibility
