

IBM InfoSphere Advanced QualityStage V11.5

Course#:KM413G

Duration:24 Hours

Price:2850.00

Course Description

This course will step you through the QualityStage data cleansing process. You will transform an unstructured data source into a format suitable for loading into an existing data target. You will cleanse the source data by building a customer rule set that you create and use that rule set to standardize the data. You will next build a reference match to relate the cleansed source data to the existing target data.

Learning Journeys that reference this course:

IBM Information Server - Developer

Objectives

Please refer to the course overview

Audience

The intended audience for this course are:

QualityStage programmers
