

IBM BigIntegrate for Data Engineers v11.5.0.2

Course#:KM700G
Duration:1 Days
Price:1350.00

Course Description

Teaches data engineers how to run DataStage jobs in a Hadoop environment. You will run jobs in traditional and YARN mode, access HDFS files and Hive tables using different file formats and connector stages.

Objectives

Please refer to course overview

Audience

This course is intended for Analysts and Contributors.

Prerequisites

Knowledge of OLAP fundamentals is recommended

Content

- Introductions to BigData and BigQuality
- YARN for dynamic DataStage job allocation
- Tracing and debugging in YARN mode
- Using log files
- Understanding configuration parameters
- Accessing Hadoop data using WebHDFS and HttpFS and using various connector stages
